

Creating a new text post

Priority	Severity	Behavior	Type	Layer	Is Flaky	Is Muted	Automation	Status	Milestone
High	Major	Positive	Functional	E2E	No	No	Manual	Actual	-

Description

Verifies that a user can successfully create and post a new message in Threads, and that the post appears correctly on the user's feed with the intended content.

Preconditions

Preconditions:

- User is logged into Threads
- Internet connection is active
- App is launched and user is on the Home Feed screen

Postconditions

- New post appears in user's profile and feed

Steps to reproduce

#	Step	Action	Expected Result
1	Tap the + button ("New thread")		Composer opens
2	Enter valid text (1–500 characters)		Text appears in the input field
3	(Optional) Add emoji		Emoji are displayed correctly
4	Tap the Post button		App starts publishing the post
5	Wait for publication		Post publishes successfully without errors
